Modern civilization has a long journey ahead to acknowledge and address the historic and ongoing impacts of colonialism that have resulted in harm to the cultures and livelihoods living interconnected with our ecosystems for many thousands of years.

1 Introduction

Line Breaks

Here is an example of how to insert an empty line between paragraphs. We do it using two blank lines...

This is the paragraph that follows the empty line.

Additionally, writers should investigate the impacts of different header levels (ex. First level (#) or Second level (##) or third (###)) as well as before and after figures/tables on spacing before and after the headers so we produce as professional looking documents as possible. There are idiosyncrasies with what happens for each above and below so that should be tested by building the documents in both formats (html and pdf) and viewing the output. Here is a test with a second level header with no empty line above and no empty line below. ## Header with no number {-}

It negates the header... wow.

If we put blank lines above the header however...

1.1 Another numbered Header

No spacing or

spacing or

br> above this line.

Here is a fpr_kable with a cross reference to Table 1.2.

Table 1.1: Here is a nice kable!

Sepal.Length	Sepal.Width	Petal.Length	Petal.Width	Species
5.1	3.5	1.4	0.2	setosa
4.9	3.0	1.4	0.2	setosa
4.7	3.2	1.3	0.2	setosa
4.6	3.1	1.5	0.2	setosa
5.0	3.6	1.4	0.2	setosa
5.4	3.9	1.7	0.4	setosa
4.6	3.4	1.4	0.3	setosa
5.0	3.4	1.5	0.2	setosa
4.4	2.9	1.4	0.2	setosa
4.9	3.1	1.5	0.1	setosa

This is what happens with multiple empty lines but no
 inserted directly after a figure...

Table 1.2: Here is a fpr_kable with no cross-ref and the scroll set to not happen when pdf built.

5.7	3.8	1.7	0.3	setosa
5.1	3.8	1.5	0.3	setosa

But if we put a
below the figure with blank lines either side of our text we are good to go.

Test.

2 Background

2.1 Project Location

Here is how we insert a figure and we can reference it like this - Figure 2.1. The caption is in the chunk header as fig.cap.

new graph environment

Figure 2.1: Overview map of Study Areas

Here is how we do multiple figures in one chunk - side by each (like toasts). We reference it like this - Figure 2.2.

Figure 2.2: Multiple figures or photos side by each.

Here is how we conditionally include chunk output based on the params\$gitbook_on parameter. If this is the gitbook version, the image will NOT be included. If this is the pdf version, this double image will not be included. We do this to make the pdf version read nicely and not be a million pages long due to individual photos taking up a half a page each.

Figure 2.3: Multiple figures or photos side by each. Turned on conditionally with the eval parameter in the rmarkdown chunk to run only when the pdf version of the document is built.

Let's add a reference here so that we can test if our system of pulling from Zotero as per https://github.com/NewGraphEnvironment/mybookdown-template/issues/49 is going to work Bramblett et al. (2002)
